STOCKBOT

Retail Store

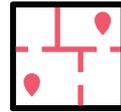

Smarter Stock Management for Enhanced Store Performance

StockBot automates inventory counts to ensure accuracy and eliminate repetitive tasks, pinpoints item locations to maximize on-shelf availability, and collects data for smarter product positioning. Discover how StockBot can boost store performance and elevate customer satisfaction.

Inventory Control

No more manual counting for near perfect accuracy (~98-99%).

Detect Misplaced Items

Quick item localization to maximize on-shelf availability.

Money Mapping

Gather detailed data for strategic product placement to boost sales.

Portal

Streamline reception for fast, accurate order validation.

Picking Warehouse

Precision Inventory for Fast, Reliable and Efficient Operations

StockBot delivers real-time stock data, flags missing items, and boosts picking accuracy to reduce losses, maintain visibility and unlock faster, smarter order fulfillment. Discover how you can gain full control of your inventory with Stockbot.

Stock Discovery

Prevent lost sales due to inventory missing or unregistered items.

Phantom Inventory

Flag items that are not physically there to optimize order fulfillment.

WMS Integration

Seamless integration to enable real-time, data-driven decisions.

Inventory Audits

Audit-ready at any time for confidence on internal or third-party checks.
